**Staffing**
No changes

**Learning and Teaching:**
The units of work for Term 2 are:
- P-2- What does it take to make?
- 3/4- How do we change as we grow?
- 5/6- Why earth?

Our focus for our staff Professional Learning meetings this term will continue to be Inquiry Learning, ICT the Ultranet and the e5 Instructional Framework.

**NAPLAN testing** was undertaken this week on Tuesday, Wednesday and Thursday. The school was audited this year on the implementation of the tests. The auditor was happy with the way the testing was conducted at Roberts McCubbin.

**Special Items/Events:**

Last Friday two special events were held at the school. The Junior School held a ‘Meet The Maker’ parade in the hall. This was linked to their current unit of inquiry and was very successful. The children all dressed up as someone who makes things. We had lots of chefs, builders and gardeners as well as a wide variety of others including a robotics engineer! The parade was followed by a cupcake making workshop for all the junior classes that was led by Linda Abbott, our cupcake queen. Thank you to Linda for sharing your talents with the children and to the parents who assisted.

Also on Friday the PFA ran their Mothers’ Day Stall which was another extremely successful event. The children, as always, just delight in choosing something special for their mum, grandmother or someone special in their lives. The PFA did a great job selecting the gifts, setting up the stall and assisting the children to make their choices. This year the stall made $600 which is a terrific effort.

**BER Building Project**
Our gym is almost finished. Handover is expected within a couple of weeks. Things needing to be completed include civil works to clear and restore the site, the installation of the play equipment, landscaping around the perimeter, installation of shelving in the sports store and the OSHC store. We are very fortunate that there was a surplus from the cost of the gym. This has been put towards the renovation of the new Junior classroom and the rest has been targeted for the restoration of the oval. I am currently seeking quotes for the restoration of the oval and on the sheet attached you can see the design that Tim Fearn-Wannan and I have put together to include a large area of synthetic grass that will include a netball court, volleyball court and 4-square courts. I also have a quote for the irrigation of the remainder of the oval.
which will remain grassed. There will be a shortfall of funds, approximately $10,000 for the synthy area and $10,000 for the irrigation of the oval which I am seeking a commitment from School Council for. We still have $11,423 uncommitted from last year’s Fair after the contribution made from these funds to the air conditioning project. The funding we will have from the BER project is approximately $77,000. What we will have after all these works are completed is a wonderful all weather area with a full size netball court and volley ball court. The area where the 4-square courts are (between the old synthetic grass and the gym) will be a fantastic shaded area.

Finance Committee met a couple of weeks ago to discuss the hiring of the new gym. We discussed the current requests we received and costs of the hiring. We already have two groups committed and I’m waiting for another group to confirm if they are still interested after a meeting of their group is held.
